3V Lith. Battery CR123 (12 Pack),
PVS-7/14 Headmount Assembly,
PSGAT Helmet Mount, MICH
Helmet Mount, USNV-IR Spot
Light Kit

The USNV-18 night vision monocular is light weight and extremely versatile in its design. The USNV-18 can be used hand-held, head-mounted, weapon mounted or attached to a camera/camcorder. The multi-coated optics and integrated infrared illuminator enhance image clarity in low light situations. The unit operates on a single 3V lithium battery and is submersible up to 2 meters. The USNV-18 also features an infrared illuminator and low battery indicator in the user's field of view, allowing the operator to monitor functionality while in hands free mode. The "single tube/single eyepiece" approach to night vision is based upon the battle proven concept that independent use of each eye maximizes the ability of the user to operate under a wide range of low light applications. This tactic enhances the user's field of view and allows the user to retain full peripheral vision in the unaided eye. The unaided eye now works in conjunction with the 40 degree field of view offered by the night vision device. Available accessories include: high magnification lenses, headmount, weapon mount, sacrificial window, camera adapter, helmet/headmount adapter and a helmet mount. The USNV-18 ships with: military soft case, (1) 3V Lithium battery and a manual.

SPECIFICATIONS

Magnification: 1x	Field of View: 40 Degress	Diopter Adjustment: -4+5
Weight: 10.2 oz.	Dimensions: 4.5x2.5x2.0	Battery: (1) 3V Lithium
Battery Life: 40 Hours	Warranty: 2 Year Limited
