The USNV PVS-7D Mil-Spec Super High Definition Night Vision Goggle is without a doubt the most sought after night vision goggle ever developed. With the use of a single high definition image tube and a dual eye configuration, the USNV PVS-7D Mil-Spec Goggle provides an outstanding performance-to-cost ratio. Each system ships with a comprehensive system data sheet outlining the performance of the system. Mil-Spec systems will meet or exceed the guidelines set forth in the specification parameters. Systems are available for Export with proper US State Department licensing, in either 1250, or 1600 Figure of Merit (FOM) configurations. The PVS-7D features simple user controls and fully automated image tube protection. This system allows the user to have complete freedom of movement while maintaining equilibrium and balance in a hands free application. The USNV PVS-7D also incorporates an infrared illuminator with a momentary and continuous on switching function. Infrared operation and low battery indicators are displayed within the user's field of view. The USNV PVS-7D comes complete with a lightweight, fully adjustable military head strap that allows for comfortable long-term use. A wide range of optional accessories include high magnification lenses, compass, infrared spot/flood lens and helmet mounting bracket for PASGT or MICH helmets. The USNV PVS-7D Goggle Ships with: System, Head-Mount, Military Soft Case, Batteries, Lens Tissue and Operators Manual.
