The new HUMMER SCOPE has transformed night vision into major exploration gear. Embark on a night hike, observe a cougar on the side of a mountain at 3 a.m. or reach your destination safely at night. The HUMMER SCOPE Night Vision Monocular intensifies available light several thousand times through a professional-grade Photonis-DEP Image Tube in a system designed to provide enhanced viewing in all low light conditions including total darkness. Newly developed, fully multicoated optics that decrease glare and improve light transmission provide excellent viewing through improved wavelength/contrast characteristics. The HUMMER SCOPE embraces modern, cutting-edge technology without forgetting practicality. The ergonomically-designed HUMMER SCOPE is small enough to fit in the palm of your hand, pocket or backpack.
