HOLoGraphic Night Vision System w/ AA Battery

U.S. Night Vision manufactures tactical-grade night vision devices. Our products include goggles, monoculars, weapon sights and night vision devices.

Made in America: our night vision devices are known throughout the world for their quality and durability.

Our commitment to customer service will ensure your satisfaction.

The HOLoGraphic Diffraction Sight (HDS) is the first electro-optic sighting system to apply holographic technology to small arms. When used in Close Quarter Battle (CQB) environments, this revolutionary optic delivers amazing speed and accuracy gains, uncompromised use of peripheral vision, and leaves no muzzle side operator signature. When the situation is critical, so is the performance of your equipment. Fast, accurate target acquisition can make the difference...and this is exactly what separates the HDS from any other sighting system...the uncompromising combination of speed and accuracy. The HDS delivers critical speed gains for the initial weapon presentation, in multiple target situations, and in conditions where either the operator or the threat(s) are moving rapidly. Engaging around physical barriers or in awkward shooting positions are now made with ease while ensuring rapid reticle to target lock-on.
