U.S. Night Vision manufactures tactical-grade night vision devices. Our products include goggles, monoculars, weapon sights and night vision devices.

Made in America: our night vision devices are known throughout the world for their quality and durability.

Our commitment to customer service will ensure your satisfaction.

MICH

Modular/Integrated Communications Helmet

Improved Compatibility With Communication Systems And Night Vision Equipment.

Level 3A Ballistic Protection (44 Mag. 240 gr. @ 1400 FPS)

**4 pt. Fully Adjustable Suspension System
7 Custom Engineered Removable Pads**

**Testing Documentation Available Upon Request
Certified By H.P. White Laboratory, Inc.**

MICH SOH

Special Operations Helmet

- * NIJ Level IIIA
- * Ideal for Spec Ops and SWAT
- * Communications Compatible
- * Night Vision Compatible

Optional Accessories

MICH Helmet Mount

–NIJ Threat Level (IIIA) Utilizing the latest technology in ballistic materials, the SOH High Ballistic Helmet was designed to exceed the expectations of the MICH helmet by providing maximum Level 3A protection (44 Mag. 240 gr. at 1400 FPS) and optimizing comfort and usage for long periods of operation. The SOH provides the following advantages: – Superior ballistic, fragmentation and impact protection, with reduced head borne weight. – Improved compatibility with night vision, communication, Nuclear, Biological and Chemical equipment. – Performs in all environmental conditions from –40F to –160F – Reduced profile optimizes peripheral vision and sensory awareness, not leaving the operator disadvantaged in hostile environments. – Improved interface with body armor allowing the user to have a full range of motion, even in the prone position. – A 4 point, fully adjustable strap-harness suspension system maximizes stability and comfort. – The Pad Suspension system includes 7 highly engineered removable pads which dramatically increase the operators comfort level. Pad Suspension System: – 7 highly engineered pads (1 crown and six oval and trapezoid pads) – Pads are removable (hand washable-mild detergent.) – Pads mold and conform to the shape of the operators head. – Pads can be moved around to accommodate gas masks, communication equipment etc. – Minimizes shock loads from ballistic, fragmentation and blunt trauma, thus dramatically reducing risk of non-ballistic injury. – Pads provide increased air circulation in the helmet keeping the operator cooler and less likely to experience heat trauma. – Provides a quieter environment for the operator. – Minimizes pressure points.
