Blackout Infrared Filters

- Blackout Infrared Filters block 99% of visible light
- Max Infrared output with extreme coveryness
- Used by Military, Law Enforcement & Industrial Clients
- Maximum durability and heat resistance
- Can also be treated for glare resistance
- Improves the effectiveness of your night vision equipment

Spotlight Filters come with a rubber boot that allows the filter to cover the existing lens. Our Flashlight Filters allow the user to operate more effectively with night vision equipment while maintaining a "visible" flashlight that can be deployed by simply flipping the filter boot off the bevel of the flashlight."

BK-120 Infrared Spotlight Kit

Greatly enhance your night vision device's capability with our Infrared Spotlight Kit. The rechargeable 1 million-candle spotlight can be used with or without a filter using the provided quick detach boot.
