

coastline micro

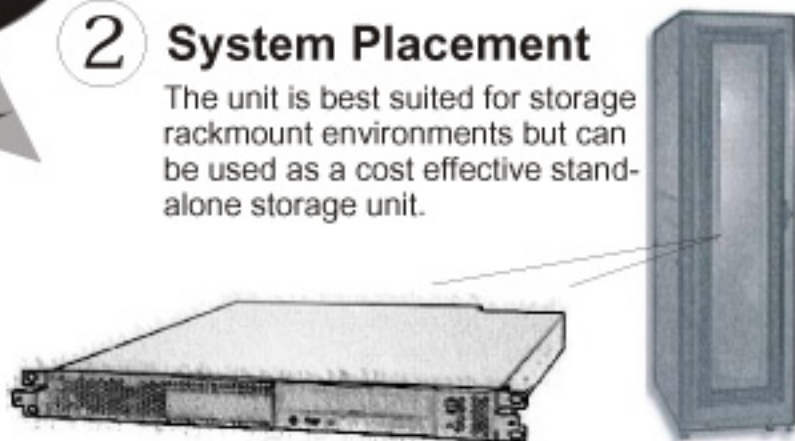

1 Unpack Package Contents

Inspect the contents of the package and the condition of the hardware. If you experience any damage to the hardware please contact Coastline Micro immediately.

2 System Placement

The unit is best suited for storage rackmount environments but can be used as a cost effective stand-alone storage unit.

3 Connect The Cables

When connecting the unit to a network make sure the unit is properly secured and the power and RJ45 cables are easily accessible.

4 Connect NAS to LAN Switch Which Connects to Server
