

monocular

Part No- 000212 (Gen 3)
Part No- 000210 (Com Spec)

USNV-18™

The USNV-18 Night Vision Monocular is light weight and extremely versatile in its design. The USNV-18 can be used hand-held, head mounted, weapon mounted or attached to a camera/camcorder. The multi-coated optics and integrated infrared illuminator enhance image clarity in low-light situations. The unit operates on a single 3V lithium battery and is submersible up to 2 Meters. The USNV-18 also features an Infrared Illuminator and Low Battery indicator in the user's field of view, allowing the operator to monitor functionality while in hands free mode. The system is also compatible with many weapons mounted laser aiming modules and holographic weapon sights. The optional weapons mount quickly attaches the unit directly to a Weaver base or Picatinny rail. The "single tube / single eyepiece" approach to night vision is based upon the proven concept that independent use of each eye maximizes the ability of the user to operate under a wide range of low light conditions. This tactic tends to enhance the users field of view and also allows the user to retain full peripheral vision in the unaided eye. The unaided eye now works in conjunction with the 40 degree field of view offered by the night vision device.

Ships With: Monocular, Military Soft Case, Shoulder Strap, 3V Battery, Objective Lens Cover, Sacrificial Window, Lanyard, Eye Cup, Camera Adapter and Ops Manual.
