Hard Case PVS/7 & 14, IR Spot
Flood Lens, EOtech 552 w/ AA
Battery, 3x Military Lens, 5x Military
Lens, Magnetic Compass,
USNV-IR Spot Light Kit

The USNV-14 utilizes the highest quality newly manufactured image intensifier tube to provide crisp clear images under the darkest conditions. Utilizing the most advanced Mil. Spec. housing, this system is built to handle the toughest of environments. The "single tube / single eyepiece" approach to night vision is based upon the proven concept that independent use of each eye maximizes the ability of the user to operate under a wide range of low light conditions. This tactic enhances the user's field of view and also allows the user to retain full peripheral vision in the unaided eye. The unaided eye now works in conjunction with the 40 degree field of view offered by the night vision device. The USNV-14 can be hand held, attached to a standard PVS-7/14 head-mount or helmet mount and it can be installed on an optional dual-carriage head-mount, providing a dual eye configuration like the AN/PVS-15. The USNV-14 is smaller and lighter than the AN/PVS-14, weighing only 9.6 oz and is fully submersible to a depth of 66 feet (20 Meters). The USNV-14 works with either a single AA or 3.5 volt lithium battery, offering more flexibility and longer battery life. The integrated IR illuminator enhances the ability of the user to read maps and operate in confined spaces. The USNV-14 is compatible with most all weapon mounted IR laser aiming and illuminating devices.

S P E C I F I C A T I O N S

Magnification: 1x	f-number: 1.2	Field of View: 40 degrees
Dioptr Adjustment: -4+6	Eye Relief: 27mm	Weight: 9.6 oz.
Voltage: 3.0 VDC	Power Source: (1) AA or 3V Lithium	Continuous Operation: >40 hours
IR Illuminator Range: ~20 meters	Dimensions: 4.2 x 2.0 x 2.5	Warranty: 2 Years
