U.S. Night Vision manufactures tactical-grade night vision devices. Our products include goggles, monoculars, weapon sights and night vision devices.

Made in America: our night vision devices are known throughout the world for their quality and durability.

Our commitment to customer service will ensure your satisfaction.

The ITAL Infrared laser is designed for rugged military and law enforcement applications. It offers a very low profile that allows it to be used on flat top rifles equipped with optical scopes or night vision equipment. This model comes with one AA battery and 6' remote cable pressure pad switch. Specify cable length if different from the standard build. – Complies with MIL-STD-810 – ITAL when mount on a top rail or bottom rail is inline with the barrel of the weapon – Laser mounts on Picatinny, NATO 1913 and Knight Armament Rails – No tools required – Operates using a single AA battery – Supplied with a standard pressure pad switch and rotary ON/OFF switch – Windage and elevation adjustment knobs are protected from impact – Windage and elevation adjustments can be made in precise 0.4 milliradian clicks
