Blackout™ IR Filter Kit

Covert Night Vision Illumination for Marine Corps 7-Ton Truck

- * Extreme Covertness
- * Heat Resistant
- * Professional's Choice

Tactical vehicle operations at night can often be difficult due to a lack of illumination. Driving with just NVGs not only slows down your element's rate of movement, but also makes recognition more difficult and increases your risk of fratricide. U.S. Night Vision's Blackout Filter Kits™ for the HMMWV, Army 5 ton, Army 2 ½ ton and the Marine Corps 7 ton are an instance force multiplier for nighttime tactical vehicle operations. Each Blackout Filter provides as much IR illumination, when seen through night vision, as a vehicle's headlight seen by the naked eye at night; facilitating a safer, faster and more efficient means of travel. Blackout Filter kits come complete with two IR headlight filters, two IR taillight filters and blackout covers for all running lights. Parts for each individual kit are listed below. Each 7 Ton Truck kit comes with: 2 Ea. IR Headlight Filters 2 Ea. IR Taillight Filters 2 Ea. Black "Orange" Headlight Covers 16 Ea. Black Running Light Covers Also includes: Nylon kit bag, instruction manual and mounting screws
