LDI's Dual Beam Aiming Laser (DBAL) waterproof system makes it easy to move from a visible daytime laser to an infrared night time laser. A variation of the DBAL system is available with an infrared aiming laser sight and infrared illuminator. Available – Can be configured with either a visible and IR aiming laser or with IR aiming laser and IR illuminator – Fully adjustable for windage and elevation in precise .4 milliradian – Integrated top Picatinny rail offers a solid mounting point for red dot sights, holographic sights, military style scopes and LDI's OPERATOR tactical flashlight – Laser system is activated using a positive OFF, ON momentary remote through pressure pad, or pulsed momentary remote – Mounts on all standard Picatinny (NATO 1913) rails – Offers the ability to instantly select between a visible SPP (635nm) diode or an infrared (835 nm) diode laser point – Operates using a single AA battery – Precision glass lens, with LDI's beam shaping technology, produces a high quality nearly round laser point at 100 meters. – Rotary mode switch allows the user to instantly select between the Infrared and visible aiming capabilities or between IR aiming laser and IR Illuminator functions – Visible and the infrared aiming lasers can be adjusted from front and rear impact – Waterproof to 20 meters – Windage and elevation knobs are protected from front and rear impact
