U.S. Night Vision manufactures tactical-grade night vision devices. Our products include goggles, monoculars, weapon sights and night vision devices.

Made in America: our night vision devices are known throughout the world for their quality and durability.

Our commitment to customer service will ensure your satisfaction.

IR mode and low battery warnings are fiber optically displayed within the user's field of view

Gen 2+ Night Vision Monocular

USNV-121 M

Generation 2+ Night Vision System

- * Light Weight
- * Water Resistant
- * Head Mountable

Optional Accessories

USNV Headmount, Camera Adapter, Hard Case Commercial, USNV 3X Lens, Surefire M1 / IR Flashlight, USNV-IR Spot Light Kit

The USNV-121 is a highly advanced, US Generation 2 Plus, compact night vision monocular. The Generation 2 Plus image tube offers 20-30% improved performance than a standard Generation 2 technology. With its new and improved optics and user controls, the USNV-121 offers numerous built in features, which include automatic brightness control, bright source protection and a low battery indicator. In addition, this unit incorporates a high power infrared illuminator that can be turned on independently. The USNV-121 utilizes fiber optics to display its low battery warning and IR operational mode within the users field of view. By attaching the USNV-121 to its optional exclusive head mount assembly, it becomes a hands free mono goggle that allows for easy eye interchangeability and a flip up mechanism for unaided viewing. The USNV-121 can be used in conjunction with a camera or camcorder as a low light image enhancer. The USNV-121 viewing capabilities can be extended with the use of long-range 3X lens. It can also be used as a weapon scope in conjunction with an external aiming device. The USNV-121's performance and versatility will satisfy the most demanding night vision user. Ships with unit, carry case, manual and battery.
